## HI-GLOSS FINISH TILES

Hi Gloss Tiles are made using a special transparent glaze. With extra colors, its beauty and sheen is enhanced to a better level. Impressed, special transparent glaze is applied on the surface and the tile is heated in a furnace to impart a high gloss resembling crystalline glasses. A thin layer of glass glaze is also applied on surface which gives extra shine and brightness. This imported granula is spread with special equipment for more smooth and transparent surface. With extra polishing, this tile is imparted a peerless sheen that is equalled by none. This tile series is highly suitable for interior wall and floor applications for Residential & Commercial areas. This is 100% replacement for Italian Marble due to its high gloss, high durability & scratch resistance.

### PRODUCT FEATURE:

• Polished refined tiles made with special transparent glaze • High resolution tiles with extra colors giving high glossy effect • High quality imported glaze is applied on surface and is then heated in furnace • The glaze crystallizes, and it is polished with special abrasives and application to produce high gloss on surface

### PRODUCT USP:

- Digital Printing +
- Abrasion Resistance
- Low Water Absorption
- Eco Friendly
- Nano Technology
- High Reduction Glaze
- 100% Replacement for Italian Marble
- Zero Maintenance
- Random Design
- Imported Super Glaze
- Granula Application

## SUGAR FINISH TILES

Sugar Finish tiles incorporate characteristics of scratch resistance & surface glimmer effortlessly. Made from sturdy materials, a sugar finish is imparted on tile surface, which improves scratch resistance and at the same time, imparts a distinct gloss. Application of sugar-like transparent granules are spread on tile and then heated in the kiln. These granules melt inside and create a glittering layer over the tile to make it look more shiny and sparkling. Such series has more friction which prevents slipping & also appears more realistic in terms of surface luster. It is suitable for interior as well as exterior decoration for heavy traffic areas.

### PRODUCT FEATURE:

- GFT tiles made from special treatment of tile surface
- Made by usual process of heating layers on furnace
- Surface is roughened in a manner that prevents slipping and imparts a distinct sheen
- An effective combination of surface toughness & beauty as well as Scratch Resistance

### PRODUCT USP:

- Digital Printing +
- Extra Sheer Shine
- Low Water Absorption
- Eco Friendly
- Zero Maintenance
- Random Design
- Anti Skid
- Glitter Effect

## METALLIC FINISH TILES

Metallic Finish tiles impart a sheen that few can easily replicate. Utilizing the best technology, metallic liquid glaze or metallic flakes are applied on surface, compressed & fired in furnace to achieve an authentic metallic finish. This uses machinery of the latest make. This metallic glaze is applied through an air power machine which results in creating layer of metallic material on surface and helps to penetrate inside. After heating up in kiln, it gives a Swarovski sparkling and glittery look. Subtle surface variations can be easily introduced via fine digital printing to achieve aesthetic perfection. It has a look of authentic metallic materials, so it is highly suggested for home applications in bathroom, living room, kitchen etc. and can also ideally be used for wall cladding in domestic and commercial areas.

### PRODUCT FEATURE:

• Made from special glaze that imparts a perfect shine • Impacted glaze consists of liquid metallic glaze or metallic flakes • The glaze is applied on surface and heated in furnace and later cooled • The surface is polished with special abrasives to impart a shimmering, reflecting metallic sheen.

### PRODUCT USP:

-  Metallic Effect
-  Abrasion Resistance
-  Low Water Absorption
-  Eco Friendly
-  Random Design
-  Matt Setting Effect
